PROFESSIONAL SUMMARY

Final-year Bachelor of Information Technology (Game Technology) with Honours, student with practical experience in Unity and Unreal Engine. Takes work from prototype through to a finished, working build, picks up unfamiliar pipelines quickly, and collaborates well with artists and designers. Comfortable taking a feature from prototype to a working build and quick to pick up unfamiliar pipelines. Available for a 6 month industrial training placement from **28 September 2026 to 12 March 2027**.

EDUCATION BACKGROUND

Bachelor of Information Technology (Game Technology) with Honours Melaka
Universiti Teknikal Malaysia Melaka (UTeM), FTMK | Oct 2023 to Present

- CGPA: 3.80
- Relevant coursework: Game Programming, Game Physics, Game Engine Development, Artificial Intelligence for Games, Game Project Management, 3D Game Development.

Matriculation, Engineering Track Johor
Kolej Matrikulasi Kejuruteraan Johor (KMKJ) | 2022 to 2023

- CGPA: 3.67

TECHNICAL PROJECTS

AgriLeap | Final Year Project, Holographic AR Simulation 2025 to 2026

- Built a holographic AR Smart farming simulation (Palm Oil) in Unity (C#) for the Tilt Five platform.
- Developed the crop lifecycle state machine, AI vision detection and yield prediction logic driving the core gameplay loop.
- Integrated live IoT sensor telemetry into an in-game dashboard, including refresh logic and data validation.

Warisan Malaysia VR/MR Experience | National Digital Innovation Creativepreneur (DICE) competition 2026

- Currently developing an immersive VR/MR experience built around Malaysian heritage, covering spatial interaction design and mixed reality presentation.

Sneak Out | Lead Developer, Online Multiplayer Game 2025

- Led a team build in Unity (C#) with networked multiplayer; implemented client synchronisation and integrated every member's module to ship on deadline.

SiteSafe | Web-Based Safety Training Simulation 2025

- Built an interactive 3D safety training environment in Three.js, running real-time rendering in the browser.

Computer Vision Compliance System 2025

- Designed and prototyped a real-time detection system in Python using OpenCV, MediaPipe and YOLOv8, with human override built into the workflow.

EXPERIENCE & EXTRACURRICULAR

- Exhibit Coordinator, ITEX 2026 International Invention & Innovation Exhibition 2026.** Coordinated the booth and live demo for our project named Implementation of Generative AI in Development of A Player-Centric Adaptive System of A Holographic Game; presenting to judges, faculty and visitors.
- Facilitator - Next Gen Teen X change 2025.** Mentored high school students in creative thinking, problem solving, and innovation for digital board games development under national MDEC initiative.

TECHNICAL SKILLS

Engines: Unity (C#), Unreal Engine 5
Programming: C#, C++, Python, JavaScript / TypeScript
Systems: Gameplay systems, AI & NPC behaviour, state machines, multiplayer networking, game physics, real-time rendering
Immersive: AR / VR / MR development, headset target optimisation, spatial interaction design, IoT data integration
Tools: Git & GitHub, Blender, FMOD, Three.js, Next.js, OpenCV
Creative: Photoshop, After Effects, CapCut, motion graphics and video production

SOFT SKILLS

- Debugs independently and traces a problem to its root cause rather than working around it.
- Collaborates closely with 3D artists and designers on asset integration and iteration.
- Communicates technical work clearly to non-technical audiences and stakeholders.
- Manages multiple parallel projects against fixed deadlines without dropping quality.

AWARDS & RECOGNITION

- Silver Award, ITEX 2026 International Invention & Innovation Exhibition
- Silver Award, FTMK Workshop 2 Innovation Competition, 2025
- 1st Place, Play Next Game Jam, plus multiple competition awards, 2023 to 2025
- Dean's List, all semesters, UTeM

LANGUAGES

Bahasa Malaysia: Native | English: Professional Working Proficiency | Bahasa Indonesia: Advanced
